Attorney Docket No.: 2927(1850-11 PCT US)

Replacement Abstract

Please replace the filed Abstract with the following Abstract:

-- A thermocouple measuring circuit for sensing a temperature at a measuring point is provided.

The thermocouple measurement circuit (12) includes a thermocouple input for sensing a

temperature at a measuring point, a compensation circuit (14) for compensating thermocouple

effects of junctions of the thermocouple, and an instrumentation amplifier (16) for summing an

output of the thermocouple and an output of the compensation circuit and outputting a voltage

indicative of the temperature sensed, wherein the output of the compensation circuit is a

reference voltage for the output of the instrumentation amplifier. Various embodiments of the

thermocouple measurement circuit may be employed in electrosurgical generators for controlling

output power dependent on temperature conditions.--
